Core SKILLS:

Programming & Scripting

Python, C++, Shell Scripting

CI/CD & Version Control:

GitLab CI, Jenkins CI

InfraStructure as Code (Iac):

TerraForm, Ansible

Security Tools:

SAST(Sonar Cloud), DAST(OWASP ZAP), SCA(Trivy)

Container Orchestration:

Kubernetes (K8S), Docker, EKS

Cloud Platform:

AWS (EC2, S3, EKS, VPC)

Monitoring & Observability:

Grafana, Prometheus

Project Management:

JIRA, Confluence

Operating System:

Linux(Ubuntu, RedHat), Windows

Debugging Tools:

GDB, WinDBG, PyCharm

IDE:

VisualStudio Code

Artifactory & Vault:

JFrog, HashiCorp Vault

PROFESSIONAL SUMMARY:

Results-driven **DevSecOps Engineer with 10+ years of experience** in designing, implementing, and securing CI/CD pipelines, cloud infrastructure, and containerized applications. experience in integrating security practices into DevOps workflows automating compliance and managing scalable cloud environments

WORK EXPERIENCE:

DevSecOps Consultant @ JLR (UK)

Jan 2022 - Present

- Architected and implemented robust CI/CD pipelines using GitLab, increasing release frequency by (30%) while decreasing build and deployment times from hours to minutes
- Implemented and Managed AWS cloud resources in S3, VPC (Subnet, Private Subnet, Nat Gateway) EC2 Instance creation using terraform and ArgoCD
- Integrated automated container scanning (Trivy) and static code analysis (SonarQube) into CI/CD pipelines, catching 94% of security vulnerabilities before production.
- Engineered automated canary deployment strategies with Istio, reducing production deployment failure rates from 12% to under 1%
- Migrated 100+ hardcoded environment variables and secrets to HashiCorp Vault, achieving 100% compliance with enterprise security standards.
- Acted as the point of contact for Product owners, stakeholders and cross functional teams for components integration, Infra related issues, and Code reviews

SDE - II @ NCR Corporation (Atlanta, USA)

Nov 2017 - Oct 2021

- Developed In-house EFT/Payment simulator and integrated to Jenkins CI/CD pipelines which helped Testing teams to overcome issues with Live remote payment systems for Debugging and reduced the usage of hardware (Pin-Pad, EFT-Gateway server) by 40%
- Managed build systems with docker images and deployments
- Managed basic Kubernetes workloads on EKS Cluster, during application migration from monolith to microservices, Bugfixes, Code Review & Enhancements for POS systems for Meijer's(US) and Coles (AUS)

SDE - I @ Strada Global (UK)

Jan 2015 - Nov 2017

- SPOC for UK & India teams to create Cross-Platform builds and Release Management using Jenkins, Flexera-Install Anywhere tools
- Implementation of Cross-Platform PROIV-Performance Monitor(PPM) library

Certifications

AWS Solution Architect Associate
GitLab CI/CD - Udemy
DevSecOps using GitLab - Udemy

EDUCATION:

Computer Science Engineering

using C, C++, Data Structures, Multi- Threading, Restful Webservices using Windows and Linux OS

- Refactored a tightly coupled Cross-Platform Tracing/Logging code into a single & reusable library and Developed Cross-Platform Shared Library for PROIV product to support MySQL database

Research Engineer @ DRDO (Govt. of India)

Oct 2014 - Dec 2015

- Designed and Implemented Distributed Multicast Gateway Server using C++, Linux, Multithreading, STL, QT-Creator from scratch using Linux OS
Designed & Implemented a Real-Time Radar Data Simulator application
- Designed & Implemented a Real-Time Radar Data Simulator application

ASHLEY STONE

Senior Software Engineer

TECHNICAL SKILLS:

Programming Languages:

Java, JavaScript, Python, SQL

Machine Learning:

TensorFlow, scikit-learn

Web Development Frameworks:

AngularJS, Node.js, Spring Boot

Cloud Platforms:

AWS, Microsoft Azure

Database Technologies:

MySQL, MongoDB, PostgreSQL

PREFERENCES:

Interested in projects involving cloud technologies and machine learning.

Enjoy collaborating with cross-functional teams to solve complex problems.

Passionate about mentoring and fostering a culture of continuous learning.

EDUCATION:

Master of Science in Computer Science
University of Technology,
Innovations, and Science, 2013

LANGUAGES:

English (Native proficiency)
Spanish (B2)

WORK EXPERIENCE:

JUNIOR SOFTWARE ENGINEER

Innovative Solutions Ltd., New York, NY

July 2013 - May 2015

- Assisted in the development of enterprise-level software applications using Java and Spring Framework.
- Participated in Agile development sprints, contributing to the successful delivery of software increments.
- Conducted code reviews and provided feedback to peers, promoting best practices and code quality standards.
- Collaborated with QA engineers to identify and resolve software defects in a timely manner.

SOFTWARE DEVELOPMENT INTERN

Tech Solutions Group, Los Angeles, CA

May 2012 - August 2012

- Assisted senior developers in designing and implementing software features for client projects.
- Conducted research on emerging technologies and presented findings to the development team.
- Participated in team meetings and contributed ideas to improve development processes.

COMPLETED COURSES:

"Advanced Java Programming" - Coursera
"Software Architecture Design Principles" - edX
"Machine Learning Fundamentals" - Udacity

EXTRACURRICULAR ACTIVITIES:

Organized coding competitions for local schools to promote computer science education.

ASHLEY STONE

Senior Software Engineer

OLIVER STERLING

Sterling Technologies

[Company Address]

City, Country

Dear Mr. Sterling,

I am writing to express my keen interest in the Senior Software Engineer position, as advertised on your company's website. Armed with a Master's degree in Computer Science, a rich background in software development, and a consistent track record of successful project leadership, I am confident in my ability to contribute meaningfully to your dynamic team.

In my most recent role at Tech Innovators Ltd. as a Software Development Team Lead, I successfully guided a team of skilled developers in implementing a real-time chat application. This project not only enhanced internal communication but also resulted in a noteworthy 25% reduction in communication lag. My experience in managing cross-functional teams and collaborating with product managers has honed my skills to drive innovation and achieve project goals effectively.

As a Senior Software Engineer at Global Solutions Inc., I spearheaded the design and implementation of a robust backend system for an e-commerce platform, resulting in a remarkable 30% increase in transaction processing speed. Furthermore, I played a pivotal role in mentoring junior developers, conducting insightful code reviews, and fostering a collaborative work environment that promotes knowledge-sharing. I'm eager to contribute my experience in development and leadership to your team.

I am drawn to Sterling Technologies because of its commitment to innovation and its reputation for creating cutting-edge solutions. I am excited about the opportunity to bring my skills in software development, project leadership, and commitment to excellence to your esteemed organization.

Thank you for considering my application. I look forward to the possibility of an interview to discuss how I can contribute to your team.

Sincerely,

Ashley Stone

03/07/2024
