PROFESSIONAL SUMMARY

Results-driven **DevSecOps Engineer with 10+ years of experience** in designing, implementing, and securing CI/CD pipelines, cloud infrastructure, and containerized applications. experience in integrating security practices into DevOps workflows automating compliance and managing scalable cloud environments

SKILLS & ABILITIES

- Coding Languages: Python, Shell Scripting, C++
- CI/CD: GitLab, Docker, TerraForm, Kubernetes
- Security Tools: SAST(Sonar Cloud), DAST(OWASP ZAP), SCA(Synk)
- Cloud: AWS -Monitoring: Grafana, Prometheus
- PM Tools: JIRA, Confluence
- OS: Linux(Ubuntu, RedHat), Windows
- Debugging Tools: GDB, WinDBG, PyCharm

EXPERIENCE

DevOps Engineer @ Tata Consultancy Services:

- Designed and implemented end-to-end CI/CD pipelines using GitLab, Python, shell scripting and ensuring security over pipeline, following OWASP standards and ensured SAST & DAST in place for specific environments
- Implemented and Managed AWS cloud resources in S3, VPC (Subnet, Private Subnet, Nat Gateway) EC2 Instance creation using terraform and ArgoCD
- Implemented and Managed Cluster (AWS EKS), Node pool upgrades and worked with other monitoring tools Prometheus & Grafana & Handling Issues related to Workloads such as Deployments & stateful sets and scaling resources based on needs
- Handled Updates and rollback using deployment strategies
- Automated and Integrated JIRA and GitLab using Shell and Python Scripting which improved the efficiency in handling the Merge requests across teams
- Acted as the point of contact for Product owners, stakeholders and cross functional teams for components integration, Infra related issues, and Code reviews

SDE – II @ NCR Corporation - Atlanta, Georgia, USA

- Developed In-house EFT/Payment simulator and integrated to Jenkins CI/CD pipelines which helped Testing teams to overcome issues with Live remote payment systems for Debugging and reduced the usage of hardware (Pin-Pad, EFT-Gateway server) by 40%
- Managed build systems with docker images and deployments
- Managed basic Kubernetes workloads on EKS Cluster, during application migration from monolith to microservices
- Bugfixes, Code Review & Enhancements for POS systems for Meijer's(US) and Coles (AUS)

Software Engineer @ Strada Global (UK)

- SPOC for UK & India teams to create Cross-Platform builds and Release Management using Jenkins, Flexera-Install Anywhere tools
- Implementation of Cross-Platform PROIV-Performance Monitor (PPM) library using C, C++, Data Structures, Multi-Threading, Restful Webservices using Windows and Linux OS
- Refactored a tightly coupled Cross-Platform Tracing/Logging code into a single & reusable library and Developed Cross-Platform Shared Library for PROIV product to support MySQL database

Research Engineer @ DRDO (Ministry of Defense, Govt. Of India)

- Designed and Implemented Distributed Multicast Gateway Server using C++, Linux, Multithreading, STL, QT-Creator from scratch using Linux OS Designed & Implemented a Real-Time Radar Data Simulator application
- Designed & Implemented a Real-Time Radar Data Simulator application

CERTIFICATIONS

GitLab CICD - Udemy

DevSecOps using GitLab – Udemy

AWS Solution Architect Associate - 2026
